

# G-FORCE™ II PRESSURE WASHERS

*Australia and New Zealand*

Graco's Complete Line of Professional  
Pressure Washers

PROVEN QUALITY. LEADING TECHNOLOGY.

# HIGH QUALITY, LONG-LASTING GRACO PRESSURE WASHERS

Experienced contractors know the difference. Graco professional pressure washers are recognized as solid investments that perform reliably, year after year.

## TRUST YOUR BUSINESS AND REPUTATION TO GRACO

Graco is committed to providing the highest quality pressure washers available, backed by the industry's best warranty.

## AMERICAN BUILT QUALITY SINCE 1926

100% factory-tested and field-proven Graco professional pressure washers are designed and manufactured in the USA with global components.

## INDUSTRY-BEST WARRANTY

Behind every Graco sprayer is the industry's best warranty. You may never use Graco's warranty — but if you do, we will be there.

## GRACO SOLUTIONS THAT KEEP YOU SPRAYING

### DRIVE OPTIONS FOR ULTIMATE PRODUCTIVITY

- Direct Drive for compact and lightweight performance
- Belt Drive delivers longer life and less vibration

### THE MOST RELIABLE PUMPS IN THE INDUSTRY

- Premium CAT Pump® on select Graco pressure washers
- The most durable, longest-lasting pumps available
- 2X longer life than other pumps

### RELIABLE, POWERFUL HONDA® GX ENGINES

- Oil Alert shuts down engine to prevent damage if oil level drops too low
- Thermal sensor prevents pump from overheating in bypass mode

### 100% HEAVY-GAUGE ALUMINUM FRAMES

- Up to 40% lighter than steel frames and standard on all Graco models
- Corrosion resistant to water and chemicals

### EXTERNAL PRESSURE UNLOADER FOR TROUBLE-FREE, ADJUSTABLE PRESSURE

- Ability to match application requirements
- Keeps water cooler and prolongs pump life
- Available on 4040 GP and CAT Pumps

### EZ START™ PRESSURE RELIEF FOR EASIER STARTING

- Allows water to bypass pump to eliminate pressure buildup in the system—a standard Graco feature
- No need to pull the gun trigger while starting the washer

# CHOOSE THE RIGHT PRESSURE WASHER

Whether you need a pressure washer for occasional cleaning or regular all-day cleaning and surface preparation jobs, our mission is to fit you to the pressure washer that is sized for the work you do to get the job done right, every time.

## EVERYDAY RELIABILITY

### Residential Remodeler or Property Maintenance

- Pressure washing multiple days a month
- Typically working on smaller jobs
- Demanding everyday reliability

## HIGHER POWER & FLOW

### Large Residential and Commercial Contractor

- Pressure washing multiple days a week
- Tackling medium to large projects
- Moving frequently from job to job

## SUPERIOR POWER & DURABILITY

### Large Commercial or Industrial Contractor

- Pressure washing continuously in less-than-ideal conditions
- Working on large, long-duration projects requiring the most power
- Require extreme durability and reliability

**Answer the following questions and refer to the chart to the right to help determine the pressure washer size and capability that best meets your needs.**

### HOW OFTEN WILL YOU BE USING THE PRESSURE WASHER?

- 10-20 hours/week
- 20-30 hours/week
- 30+ hours/week

### WHAT TYPE OF CLEANING WILL YOU DO?

- Surface Cleaning
- Concrete Striping
- Mildew/Mold
- Commercial Buildings and Equipment

### WHAT IS YOUR BUDGET?

- \$
- \$\$
- \$\$\$

# TECHNOLOGY THAT MAKES THE DIFFERENCE

## KEY FEATURES TO CONSIDER FOR MAXIMUM PRODUCTIVITY

While pressure washers are simple machines, understanding the key components and differences will help you make the right purchase.

### THE ENGINE

**Commercial-grade Honda or Kohler® engines vs. lower quality, off-brand engines**

- Brand name manufacturers in the business of building great engines
- Proven reputation for quality and ongoing support and service

### THE WATER PUMP

**Professional-grade Triplex plunger pumps vs. consumer-grade Axial pumps**

- AR, GP, and CAT pumps vs. lower quality, off-brand pumps
- Forged Brass Manifold, on all Graco pumps, reduces heat to extend life vs. stainless steel caps and manifold
- Good, Better, Best options on quality, serviceability, and life of the pumps

### THE FRAME

**Lighter frames are easier to handle**

- Aluminum frame — a standard Graco feature that's lightweight, resistant to rust, and easy to move around the jobsite
- Steel frame — heavy, harder to move and load in the truck

**Look for durability in the axle to ensure the frame remains constant and square**

- Professional-grade 19 mm axles vs. smaller 16 mm axles on lower quality models

### THE PRESSURE UNLOADER

Letting the motor run while not spraying can build up pressure and excess heat in the system, causing the pressure washer to overheat and shut down. The pressure unloader prevents overheating and prolongs the life of your sprayer.

Adjustable pressure unloaders, a standard Graco feature, vs. fixed unloaders allow you to vary the pressure based on the application.

**INTEGRATED** — Ideal for jobs with constant spraying while the motor is running.

**EXTERNAL** — Ideal for longer jobs with lots of stops and starts. Allows water to run cooler for greater protection against overheating.

## BELT DRIVE VS. DIRECT DRIVE

There are two main types of pressure washers that deliver top performance. The main difference is life. Choosing the right type depends on how often you will be using the sprayer.

### DIRECT DRIVE

**Compact Design, Lighter Weight, Fewer Components**

- The pump is connected directly to the drive shaft of the engine
- Pump rpm matches that of the engine (usually around 3500 rpm)

### BELT DRIVE

**Lower RPM/Operating Temperature, Longer Pump Life**

- The pump is connected to a pulley and belt system that is connected to the engine
- Allows the pump to run at a much lower rpm (typically 900-1700 rpm)
- The pump is mounted away from the engine and has a crankcase with more oil capacity
- Allows the pump to run much cooler than a direct drive pump
- The pump vibrates less and suffers less pump fatigue

Model Shown: 4240 KA-DD

## EVERYDAY RELIABILITY

### REMODELER & PROPERTY MAINTENANCE

G-Force II 3325 HA-DD, 3230 HA-DD, and 4240 KA-DD pressure washers are the best choices for medium duty applications. They're light, compact, and the perfect choice when you need consistent reliability for the occasional cleaning job.

Honda Engine, AR Pump, 3300 psi, 2.5 gpm	3325 HA-DD	25N638
Honda Engine, AR Pump, 3200 psi, 3.0 gpm	3230 HA-DD	25N639
Kohler Engine, AR Pump, 4200 psi, 4.0 gpm	4240 KA-DD	25N640

Model Shown: 4040 HG-DD

## HIGHER POWER & FLOW

### LARGE RESIDENTIAL OR COMMERCIAL

G-Force II 4240 HA-DD and 4040 HG-DD pressure washers are built tough to handle weekly use and deliver high flow and pressure in a compact, durable package.

Honda Engine, AR Pump, 4200 psi, 4.0 gpm	4240 HA-DD	25N641
Honda Engine, GP Pump, 4000 psi, 4.0 gpm	4040 HG-DD	25N681

Model Shown: 4040 HC-BD

## SUPERIOR POWER & DURABILITY

### LARGE COMMERCIAL OR INDUSTRIAL

G-Force II 4040 HC-DD, 4040 HG-BD, and 4040 HC-BD pressure washers are Graco's top-of-the-line units, designed to tackle the toughest cleaning jobs. With the highest performance available for tough, all-day cleaning and surface preparation, these models can easily handle even the most demanding jobs.

Honda Engine, CAT Pump, 4000 psi, 4.0 gpm	4040 HC-DD	25N682
Honda Engine, GP Pump, 4000 psi, 4.0 gpm	4040 HG-BD	25N683
Honda Engine, CAT Pump, 4000 psi, 4.0 gpm	4040 HC-BD	25N684

# TIP SELECTION

## MAXIMIZE YOUR CLEANING POWER

### TIP ORIFICE SIZE

You can maximize your cleaning power by selecting the tip that best matches the maximum pressure and flow of your pressure washer from the chart below.

For lower pressure spraying, choose a larger size tip to maximize your flow and cleaning power.

LPM	103 LPM	138 LPM	172 LPM	207 LPM	241 LPM	275 LPM
7.57	3.5	3.0	3.0	3.0	3.0	3.0
9.46	4.0	3.5	3.0	3.0	3.0	3.0
11.36	5.0	4.5	4.0	3.5	3.0	3.0
13.25	5.5	5.0	4.5	4.0	3.5	3.5
15.14	5.5	5.5	5.0	4.5	4.5	4.0

### TIP ANGLE

Different tip angles are used for different jobs, as noted in the chart below.

	0 DEGREE RED	15 DEGREE YELLOW	25 DEGREE GREEN	40 DEGREE WHITE	CHEMICAL BLACK
DESCRIPTION	Cutting Tip	Chiseling Tip	Flushing Tip	Washing Tip	Chemical Tip
USE	Delivers a concentrated stream that can gouge or cut.	Works like a scraper when used at a 40° angle.	Most common nozzle for general cleaning.	Wide spray for washing or rinsing a large area.	Low pressure nozzle for use with detergent injector.
TYPICAL JOBS	Removing stains from concrete or other hard surfaces.	Stripping paint; removing grease, mildew, and stains.	Cleaning dirt from siding, sidewalks, outdoor furniture, etc.	Washing vehicles, windows, aluminum siding, and other delicate surfaces.	Applying detergent, misting and rinsing.

### TIP PART NUMBERS

Use the chart below to find the right Graco G-Force II tip part number.

ORIFICE SIZE	0 DEGREE RED	15 DEGREE YELLOW	25 DEGREE GREEN	40 DEGREE WHITE	SET OF 4 TIPS (0, 15, 25, 40)
2.7	805591	805592	805593	805594	—
3.0	805535	805536	805537	805538	244768
3.5	805539	805540	805541	805542	244769
3.7	805595	805596	805597	805598	—
4.0	805543	805544	805545	805546	800708
4.5	805547	805548	805549	805550	800709
5.0	805551	805552	805553	805554	800710
5.5	805555	805556	805557	805558	
<b>CHEMICAL INJECTOR TIP</b>					805634

### ROTATING AND OSCILLATING TIPS

Rotating and oscillating tips increase your cleaning power and decrease your cleaning time. They offer 0° spray impact with 25° coverage. Tips include filter with quick connect and offer heavy-duty components for long life and reliability. For use on sidewalks, driveways, track vehicles, muddy areas, old peeling paints, and concrete surfaces.

#### ROTATING TIP
