35,000KG AIR ACTUATED BOTTLE JACK

Max	Min	Max	Hydraulic	Air Pressure	Air Inlet Fitting	
Capacity	Height	Height	Lift	Range		
35,000kg	264mm	414mm	150mm	110-125psi	¼"x18 NPT	

WARNING INFORMATION

The instructions and warnings contained in this manual should be read and understood before using or operating this equipment. Do not allow anyone to use or operate this equipment until they have read this manual and have developed a thorough understanding of how this equipment works. Failure to observe any of the instructions contained in the manual could result in severe personal injury to the user or bystanders, or cause damage to the equipment and property. Keep this manual in a convenient and safe place for future reference.

Whilst every effort has been made to ensure accuracy of information contained in this manual, the Borum policy of continuous improvement determines the right to make modifications without prior warning.

SAFETY INSTRUCTIONS

SAFETY OPERATING INSTRUCTIONS

- Check vehicle owner's manual for correct vehicle weight DO NOT exceed the Bottle Jacks rated safe working capacity.
- ✓ Use only as specified by the manufacturer.
- ✓ The Bottle Jack is a lifting and lowering device only. Immediately after lifting, support the vehicle with appropriate Jack Stands.
- ✓ Ensure that each stand is securely located under a strong point on the vehicle consult vehicles owner's manual for guidance.
- ✓ Use only on a hard, level surface.
- ✓ Prior to lifting a vehicle, apply the emergency park brake.
- ✓ Securely chock wheels remaining on the ground.
- ✓ Centre the load prior to lifting.
- NEVER attempt to move the load while on the jack. The jack must only be used in a static position for lifting and lowering loads. Ensure that the load remains stable at all times.
- ✓ For your safety, do not modify or alter this Bottle Jack.
- ✓ NEVER use the Bottle Jack if damaged, any suspect parts are noted or it has been subjected to a shock load.
- ✓ When servicing, use only Borum identical replacement parts. Use of any other parts will void the warranty.
- ✓ NEVER use brake fluid or any other improper fluid and avoid mixing different types of oil when adding hydraulic oil. Only a good quality hydraulic jack oil can be used.
- ✓ Use the right product for the job. There are certain applications for which the Bottle Jack was designed. Do not modify the Bottle Jack and do not use the Bottle Jack for a purpose for which it was not intended.

<u> WARNING </u>

ENSURE WHEELS ARE CHOCKED BEFORE LIFTING. ENSURE JACK IS USED ON A HARD LEVEL SURFACE THAT CAN HOLD THE WEIGHT. ENSURE THE LOAD IS CENTRALLY LOCATED ON THE HEAD CAP. CONSULT THE VEHICLE MANUFACTURER OWNERS MANUAL PRIOR TO LIFTING THE VEHICLE TO ENSURE THE CORRECT LIFT POINT SPECIFIED BY THE VEHICLE MANUFACTURER IS USED. THIS IS A LIFTING AND LOWERING DEVICE ONLY AND IS DESIGNED FOR LIFTING PART OF THE TOTAL VEHICLE. DO NOT MOVE OR DOLLY THE VEHICLE WHILST THE VEHICLE IS ON THE JACK.

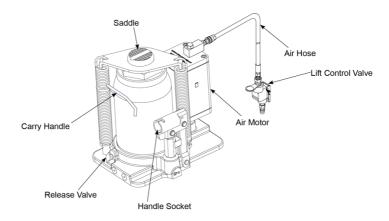

ASSEMBLY, OPERATION & PREVENTATIVE MAINTENANCE

1. FEATURES

The Borum Air Actuated Hydraulic Bottle Jack is designed to operate either manually or pneumatically for lifting and lowering, but not sustaining load. This 35,000kg Heavy-Duty Air/Hydraulic Bottle Jack is the perfect choice for a wide variety of uses. The power of air makes it easy to lift farm vehicles, trucks, lawn mowers, heavy equipment and other large loads. The manual function allows for normal operation anywhere, even without an air supply.

2. BEFORE USE

Conduct a thorough visual inspection checking for any abnormal conditions, such as cracked welds, and damaged, loose, or missing parts.

- 1. Verify that the product and the application are compatible.
- Pour a teaspoon of good quality air tool lubricant into the air supply inlet of the lift control valve. Connect to air supply and operate for 3 seconds to evenly distribute lubricant.
- Check to ensure the that the pump operates smoothly before putting into service. Replace worn or damaged parts and assemblies with manufacturer approved parts only.
- 4. This product is fitted with a standard 1/4" NPT air fitting. To change the fitting install a 1/4" NPT fitting of your choice, ensure the thread tape or compound is used to seal the connection.

NOTE: Eliminate any air in the hydraulic system by purging before first use.

Pneumatic System: Use the slotted end of the handle to turn the release valve (04) 1-1/2 turns counter-clockwise and remove the plug (34) by gently pulling. Connect the air inlet fitting into the air supply hose lock fitting, then turn on the air valve (45) letting the pump work for about 10 seconds to eliminate air in the system. **Manual System:** Use the slotted end of the handle to turn the release valve (04) 1-1/2 turns counter-clockwise and remove the plug (34) by gently pulling, insert the handle into the handle bracket and pump it 10 to 15 times to eliminate the air in the hydraulic system.

3. OPERATION

Prior to each use always conduct a visual inspection checking for and any abnormal conditions, such as cracked welds, and damaged, loose, or missing parts.

Raising the Jack:

- 1. Block the vehicle's wheels for lifting stability. Secure the load to prevent inadvertent shifting and movement.
- 2. Position the jack near desired lift point.
- 3. Set the parking brake in the vehicle.
- Refer to the vehicle manufacturer owner's manual to locate approved lifting points on the vehicle. Position the jack so the saddle is centred and will contact the load lifting point firmly
- 5. Assemble the handle; ensure that spring clips align with slots.
- 6. Close the release valve by turning it clockwise until it is firmly closed.
- Insert and secure the handle into handle sleeve. Pump handle or squeeze the lift control valve until the saddle contacts load. To end air operation simply release the grip on the lift control valve.
- 8. Raise load to the desired height, then immediately transfer the load to appropriately rated jack stands.

WARNING

Never wire, clamp or otherwise disable the lift control valve to function by any means other than by using the operator's hand. Use the handle provided with this product or an authorised replacement handle to ensure proper release valve operation. Do not use extensions on the air hose or on the operating handle.

To Lower Vehicle:

- 1. Raise load high enough to allow clearance for the jack stands to be removed, then carefully remove jack stands.
- 2. Insert handle release valve and slowly turn handle counter clockwise, no more then 1/2 a turn.
- 3. Grasp the handle firmly with both hands. Securely hold on to the jack handle so your hands do not slip and ensure the load does not rapidly lower.
- 4. (Do not allow bystanders around the jack or under the load when lowering the jack).

4. MAINTENANCE

If you use and maintain your equipment properly, it will give you many years of service. Follow the maintenance instructions carefully to keep your equipment in good working condition. Never perform any maintenance on the equipment while it is under a load.

Inspection: Inspect the product for damage, wear, broken or missing parts (eg: pins) and that all components function before each use. Follow lubrication and storage instructions for optimum product performance. Ensure all moving parts are clear of dirt and debris.

Cleaning: If the moving parts of the equipment are obstructed, use cleaning solvent or another good degreaser to clean the equipment. Remove any existing rust, with a penetrating lubricant.

Lubrication: This equipment will not operate safely without proper lubrication. Using the equipment without proper lubrication will result in poor performance and damage to the equipment. A coating of light lubricating oil to pivot points, axles and hinges will help to prevent rust. Periodically check the pump piston and ram for signs of rust or corrosion. Clean as needed and wipe with an oily cloth.

NEVER USE SANDPAPER OR ABRASIVE MATERIAL ON THESE SURFACES.

To Add Jack Oil:

NEVER USE BRAKE FLUID, TURBINE OIL, TRANSMISSION FLUID, MOTOR OIL OR GLYCERIN. IMPROPER FLUID WILL CAUSE PREMATURE FAILURE OF THE JACK AND THE POTENTIAL FOR SUDDEN OR IMMEDIATE LOSS OF LOAD

- 1. With saddle fully lowered and pump piston fully depressed, set jack in its upright level position.
- 2. Remove oil filler plug.
- 3. Fill until oil is level with the filler plug hole, reinstall oil filler plug.

Replace Jack Oil:

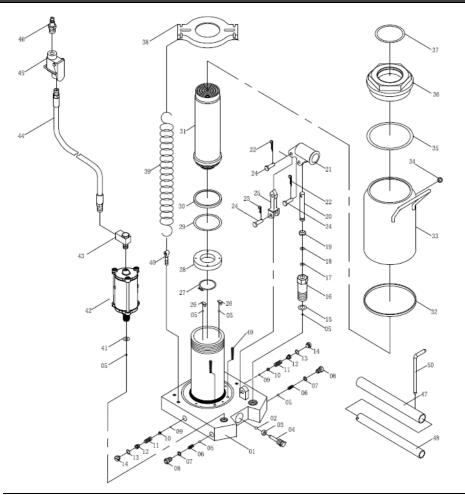

For best performance and longest life, replace the complete fluid supply at least once per year.

- 1. With the saddle fully lowered and pump piston fully depressed, remove the oil filler plug.
- 2. Lay jack on its side and drain the fluid into a suitable container.
- Fill the oil case until oil level is just beneath the lower rim. KEEP DIRT AND OTHER MATERIAL CLEAR WHEN POURING.
- 4. Replace oil plug.
- 5. Perform air purge procedure.

5. SERVICE & REPAIR

Any Bottle Jack found damaged in any way, or found to be worn or operates abnormally should be removed from service until repaired by an authorised service agent. Owners and / or operators should be aware that repair of this product may require specialised equipment and knowledge. Only authorised parts, labels, decals shall be used on this equipment. Annual inspection of the Bottle Jacks is recommended and can be made by an authorised repair facility to ensure that your equipment is in optimum condition and that the equipment has the correct decals and safety labels specified by the manufacturer.

Our heavy duty commercial range of "Borum Industrial" equipment, has been manufactured to exacting standards for the past 30 years, We specify industrial quality components and design to ensure a long and durable working life in a heavy duty transport, train, mining and earthmoving environment. Our "Borum Industrial" range of equipment is focused on achieving world-class professional standards, reliability, quality, and innovation whilst delivering great value.

TROUBLESHOOTING

Problem	Cause	Solution	
Jack will not lift	Release valve not tightly closed	Ensure release valve tightly closed	
	Overload condition	Remedy overload condition	
	Air supply inadequate	Ensure adequate air supply	
Jack bleeds off after lift	Release valve not tightly closed	Ensure release valve tightly closed	
	Overload condition	Remedy overload condition	
	Hydraulic unit malfunction	Contact place of purchase	
Jack will not lower after	Reservoir overfilled	Drain fluid to proper level	
unloading Linkages binding		Clean and lubricate moving parts	
Poor lift performance	Fluid level low	Drain fluid to fluid level	
	Air trapped in system	With ram fully retracted, remove oil	
		filler plug to let pressurised air escape	
		reinstall oil filler plug	
Will not lift to full	Hydraulic Fluid level low	Add good quality hydraulic oil to	
extension		maintain proper fluid level	
		Do Not use brake fluid or similar	

WARRANTY

Borum products have been carefully tested and inspected before shipment and are guaranteed to be free from defective materials and workmanship for a period of 12 months from the date of purchase except where tools are hired out when the guarantee period is ninety days from the date of purchase.

Should the machine develop any fault, please return the complete tool to your nearest authorised warranty repair agent or contact TQB Brands Pty Ltd Warranty team – warranty@tqbbrands.com.au.

If upon inspection it is found that the fault occurring is due to defective materials or workmanship, repairs will be carried out free of charge. This guarantee does not apply to normal wear and tear, nor does it cover any damage caused by misuse, careless or unsafe handling, alterations, accident, or repairs attempted or made by any personnel other than the authorised TQB Brands Pty Ltd repair agent.

This guarantee applies in lieu of any other guarantee expressed or implied and variations of its terms are not authorised.

Your TQB Brands Pty Ltd guarantee is not effective unless you can produce upon request a dated receipt or invoice to verify your proof of purchase within the 12 month period.

Consumer Guarantee

Our goods come with a guarantee that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.
