

PHOTOLUMINESCENT MARKING · ADHESIVE TAPE · OUTDOOR GRADE

Luminokrom Photoluminescent Tape

Tape is the no-work version of the paint. It charges off daylight or artificial light and stays visible for 10 hours after dark, with no undercoat, no dosage to hit and no cure time before the area reopens. Outdoor grade, Class G, made in France.

10 H

Night-time visibility

CLASS G

Certified to CE ISO 17398

10 M

Roll length, three widths

Where it is used

- STAIR NOSINGS AND STEP EDGES: indoor and outdoor stairs and ramps.
- WALKWAY EDGES: plant walkways, platforms and pedestrian route edges.
- EVACUATION ROUTES: exit paths, doorways and stairwells that have to stay readable when the power goes out.
- MOBILITY ZONE SIGNAGE: wayfinding in public and commercial buildings.
- LIVE SITES: marking that goes down without closing the area to paint and cure it.
- FIXED OBSTACLES: bollards, posts, low beams and protruding edges.

ADHESIVE TAPE · OUTDOOR GRADE · CLASS G

Specifications and ordering

Three widths on 10 m rolls, all Almond Green. The surface has to be clean, dry and free of dust and grease, which is the usual reason a roll lifts early.

Order codes

PART CODE	DESCRIPTION
LK-TAPE-OUT-25	Outdoor tape, 25 mm x 10 m roll
LK-TAPE-OUT-50	Outdoor tape, 50 mm x 10 m roll
LK-TAPE-OUT-100	Outdoor tape, 100 mm x 10 m roll

● NOT AN EMERGENCY LIGHTING PRODUCT

Photoluminescent tape is passive signage. It does not replace anything required under a building fire and evacuation compliance plan. What it does is keep working when the power is out, which is when lit signage stops.
