18" ROLLER FRAME

The Big Ben Frame paints smoothly and quickly with all 18-inch roller covers. Lightweight yet strong polypropylene construction. Will not rust, easy to clean. Roller takes just a second to install or remove—no loose hardware, no tools required. For use with extension poles, including the no-twist Wooster Sherlock GT[®]. It's a high-production, affordable 18-inch frame.

ALL-IN-ONE TRAY

The Big Ben Tray is stiffer than similar plastic trays on the market, and lighter than comparable metal trays. Excellent for 18-, 14-, and 12-inch rollers. Large enough for a miniroller, brush, and 9-inch roller together—move the whole tray without juggling. Big 1-gallon capacity cuts down on refills. Edge compartments hold brushes and other tools, keeping them off the floor. Polypropylene material resists solvents and paint buildup. Dimensions: 16" L x 21" W x 4" D.
