

Protect your investment with Graco automatic lubrication equipment

Save money by extending equipment life, increasing productivity, reducing operating costs and having a safer work environment.

Automatic Lubrication Solutions

Saving you time and increasing productivity

Graco has systems for:

- Agricultural Equipment
- Bottling Operations
- Beverage Production
- Cement Plants
- Construction Equipment
- Food Processing
- Forestry & Lumber
- Gas Compression
- Injection Molding
- Machine Tools
- Material Handling
- Military Vehicles
- Mining Equipment
- On-Road Vehicles
- Packaging
- Power Generation
- Primary Metals Manufacturing
- Printing Press
- Pulp & Paper
- Stamping Presses

And more...

PROVEN QUALITY. LEADING TECHNOLOGY.

Over 50 percent

of equipment failure is due to improper lubrication*

Graco offers a complete range of high performing automatic lubrication solutions

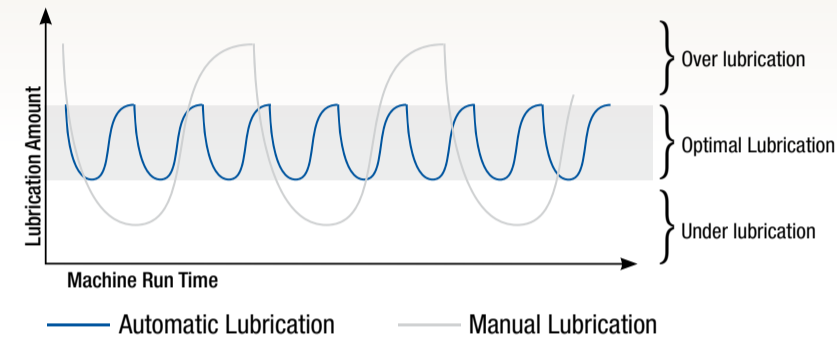

Let Graco lube it!

For longer-lasting, better performing equipment

Automatic lubrication keeps the amount of lubrication in the optimal range at all times.

- Small amounts at frequent intervals
- In the right place at the right time—no more skipped lube points!
- No more over or under lubrication

Excess heat build-up, faster component wear and wasted lubricant adds up to unnecessary labour costs, material costs, and higher energy consumption. With Graco automatic lubrication equipment you'll be sure to get the most from your equipment and more productivity per machine operator.

Equipment running at peak performance means more money in your pocket

* Machinery Lubrication Magazine, January 2007

The Benefits of Automatic Lubrication

Extends Equipment Life

Proper lubrication means less component wear—extending your equipment's useful life and minimizing downtime for repairs.

Reduces Operating Costs

Consume less energy, use less lubricant and run at maximum capacity.

Increases Productivity

Lubricating your equipment while it's working eliminates downtime for routine lubrication and maintenance.

Results in Less Waste

Measured amounts eliminates wasted lubricants and maintenance labour.

Safer Work Environment

Manually lubricating machinery while it is in operation can be hazardous. Graco automatic lubrication equipment keeps you out of harm's way.

Pumps, metering devices, controllers and accessories for any budget or market.

Single Point Lubricators

Simple, reliable, and straightforward. Automatic lubrication benefits with minimal up-front investment—nothing could be easier.

Single Line Resistive Systems

Resistive products are the starting point for centralized automatic lubrication, offering simple oil metering solutions for tight spaces and budgets.

Single Line Parallel Systems

Straightforward designs that deliver precise amounts of lubrication to multiple points, simultaneously. Easily expandable as your requirements grow.

Series Progressive Systems

The advanced centralized lubrication solution. Provides positive lube cycle feedback, and is the system of choice when critical operations need protection against downtime.

Air/Oil Systems

A constant flow of air helps keep bearings cool and free of contaminants while a precise amount of oil is supplied to ensure proper lubrication. Uses series progressive metering technology for positive lube cycle feedback.
