QUICK INFORMATION GUIDE

The PHP15D is a 4.5HP two stage high pressure compressor capable of running at 175PSI. These machines are fantastic for tyre inflation i.e. truck tyres or applications where large volumes of air at high pressure is required. The advantages of a two stage compressor is that you do not lose volume of air at higher pressure. The air temperature is some 40% cooler than the standard type of air compressor therefore producing less condensation.

Electric start engine does not come with battery, leads or provisions for battery. Peerless can manufacture to your design plus there are other standard designs for each model.
