QUICK INFORMATION GUIDE

Peerless Products are proud to produce its own brand in High Quality Rotary Screw Compressors (HQ-Air). We have always been involved with screw compressors but now have designed our own to suit the demands of the Australian market.

The 10HP / 7.5kW model is a Full Feature model which includes the screw, dryer and tank, making it easier to install, just have your industrial electrician wire it in and you're set. This eliminates installation cost on fitting a dryer, labor times and reduces floor space!

Please note: Power supply is very important when selecting an air compressor, along with selecting the right one for the application. Please talk to your local Peerless representative.
