

## Aluminium Cleaner

### Description

Aluminium Cleaner is an extremely powerful organic acid-based cleaner for the effective cleaning of both alloys, as well as steel surfaces. Alloy becomes tarnished, and eventually no matter how much washing is done, surfaces will still look dirty and dull (pictured). Aluminium Cleaner revitalises by deep cleaning alloy, leaving a fresh new look.

### Application

Aluminium Cleaner should be used full strength or diluted for minor cleaning, using a spray atomiser, allow to sit for a few minutes then rinse off thoroughly with water.

Apply using an acid sprayer or a brush. Once applied allow to sit for a couple of minutes (agitate on heavily soiled areas) and rinse thoroughly with water. Use neat or dilute up to 10:1.

Suitable for: alloy, plastic

### Package Size

Package size            5 Litre, 20 Litre, and 200 Litres

### Typical Characteristics

Name	Fabric Protector
Appearance	Clear liquid
Specific Gravity	1.15
Odour	Acidic
