

HD5000

Biodegradable Degreaser

Safe, Strong, and Water Soluble!

PRODUCT DESCRIPTION

Sierra's 'HD5000' was developed as a true alternative to the flammable Solvent Degreasers used by the trade. Fast acting, and capable of penetrating caked on grease and oil.

HD5000 Degreaser is a slightly alkaline degreaser with a broad surfactant package to deal with all manner of oil and grease and dirt, including red dirt stains. In fact, the robust surfactant package allows for various dilution ratios depending upon the task at hand.

Upon contact with grease & oil, HD5000 Degreaser converts the greases to soap (saponification), and emulsifies it, allowing it to be simply washed away from the surface.

Characteristics

- ✓ **Non-Flammable** – nonregulated for transportation and storage
- ✓ **Non-Combustible**
- ✓ **Fast Acting** – Penetrates and cleans quickly
- ✓ **Biodegradable and Quick Break**
- ✓ **Dilutable** – neat to 4:1 for most tasks
- ✓ **Safe** – Safe on rubbers and plastics

Engines, parts & equipment, concrete, and many more uses

APPLICATION

Use in place of Solvent Degreasers, applied by brush or spray (air, trigger), and allowed to penetrate for between 3 to 10 minutes depending upon the situation. For very dirty situations, it is often helpful to work in with a brush. Wash away with water. HD5000 is ideal for use through pressure cleaners.

For heavy degreasing – use neat. Caution should be taken when using on alloy components. Wash off immediately to avoid affecting the finish. Do not use on polished alloy. HD5000 Degreaser has been used in the workplace for over 20 years.

For full details on safety, please request a MSDS sheet.

CHARACTERISTICS

Appearance	Green Colour
Specific Gravity	1.10
Flashpoint	n/a
Characteristics	Alkaline
Use	Degreaser – Heavy Duty

Uses

Mining – Cleaning of heavy equipment using Pressure cleaners.
Automotive – Engine degreasing
Industrial – floors, concrete, equipment
Contract Cleaning – shopping centres, schools
Surfaces – Steel, concrete, brick, asphalt, glass
