

**HD5000**

Water Based Degreaser

## Description

HD5000 is a heavy duty water based biodegradable degreaser that will remove dirt, grime, oil and grease. It has been designed for exterior and interior cleaning. Should not be applied to magnesium components or painted surfaces.

HD5000 Degreaser is a slightly alkaline degreaser with a broad surfactant package to deal with all manner of oil and grease and dirt, including red dirt stains. In fact, the robust surfactant package allows for various dilution ratios depending upon the task at hand.

Upon contact with grease & oil, HD5000 Degreaser converts the greases to soap (saponification), and emulsifies it, allowing it to be simply washed away from the surface.

## Application

Applied by brush or spray (air, trigger), and allowed to penetrate for between 3 to 10 minutes depending upon the situation. For very dirty situations, it is often helpful to work in with a brush. Wash away with water. *HD5000* is ideal for use through pressure cleaners.

For heavy degreasing – use neat. Caution should be taken when using on alloy components. Wash off immediately to avoid affecting the finish. Do not use on polished alloy.

## Dilution / Package Size

Package size                    5 Litre, 20 Litre, 200 and 1000 Litres

## Typical Characteristics

Appearance	Green Colour
Specific Gravity	1.10
Flashpoint	n/a
Characteristics	Alkaline
