Python pumps are ideal for applications that require a pump to operate in an potentially explosive atmosphere and can run off regulated natural gas or compressed air. These pumps have the lowest out of pocket cost, are easy to operate and use half the air consumption of other pumps in the market. Plus, the Python's extreme duty plungers, seals and timing valve are designed for years of operation before replacement.

Operating Environment

The Python is designed to operate in environments from -40°F to 175°F (-40°C to 79°C), made entirely from 316 SST parts and are sealed against water and dust.

Accurate Control

Ultra precision stroke adjustment between 1/4 to 1 inch (6.4 to 25.4 mm) ensures accurate injection rates.

Environmental

Reduced fugitive methane emissions.

Chemical Compatibility

HNBR, FKM, FKM ETP, FFKM, and TFE/P plunger packings and check valve seals can handle some of the most aggressive chemicals.

Consistent Operation

Pump cycle rate remains constant regardless of system back pressure.

Plunger Rod

Pythons are offered with Chromex coated plungers as the standard product offering. Ceramic coated plungers are also offered as an option. See page 70 for more information regarding benefits of Chromex and Ceramic plunger rod coatings.

Standards

CE and ATEX approved.

Adjustable fluid packing lasts up to 25 times longer than non-adjustable seals

ATEX Approved

Key Points
- Standard pressure pumps feature 1/4 in npt (f) inlet and outlet connections.
- High pressure pumps feature 1/4 in npt (f) inlet and HiP HF4 outlet connections.
- B32240 can be used to convert HF4 outlet connection to 1/4 in npt (f) for applications 10,000 psi and under.
