Photoluminescent paint: a new dimension for artistic creation

Developed and produced in France by OliKrom, LuminoKrom® paint captures daylight and glows at night, creating **luminous markings that remain visible for over 10 hours**.

Designed for artists, designers, and creative project leaders, LuminoKrom® photoluminescent paint opens up new dimensions of expression, both day and night. Invisible or discreet in natural light, it reveals itself in the dark by restoring the absorbed light energy, transforming **surfaces into living, evolving media**.

Monumental frescoes, immersive installations, playful markings, or urban scenography: LuminoKrom® allows you to play with time, perception, and movement. Used both outdoors and indoors, it invites the public to rediscover places from a different perspective, **creating surprise and reinforcing the emotional impact** of the works.

An innovative material that serves creativity, spatial identity, and sensory experience.

THE RANGE

LUMINOKROM®

The LuminoKrom® range offers high-performance photoluminescent paints and products designed for long-lasting visibility without energy consumption, both indoors and outdoors.

SPECIFICATIONS

- ⦿ Products suitable for **many uses**
- ⦿ **Patented** photoluminescent technology
- ⦿ **Autonomous** operation, without electricity
